Summary

Highly driven and analytical Master's student in AI and Robotics at Universität Konstanz, with a strong foundation in Python, SQL, and developing application layers on Large Language Models (LLMs). Eager to apply expertise in database architecture, full-stack development, and AI/ML to contribute to LNNRT's mission. Possessing a systematic approach to software development, strong problem-solving skills, and a proven track record in building scalable, data-intensive applications. Seeking an AI Engineer Intern role to leverage excellent communication skills, collaborate in a fast-paced startup environment, and drive innovation in AI development. Fluent in English, with basic German and Swedish proficiency.

Experience

Software Developer Intern

01/2025 - 07/2025

Nutrish.ai - Sweden

Led end-to-end development of a responsive full-stack web application, focusing on robust database architecture with Drizzle ORM and PostgreSQL for efficient data management. Implemented features leveraging time series data and sensor integration, demonstrating relevance to data acquisition and analysis for reporting. Successfully integrated AI SDK, Langchain, and LLMs to develop personalized recommendations and advanced application layers.

Co-Founder/Lead Fullstack Developer

12/2023 - 12/2024

Circleup AG - Switzerland

Led development and maintenance of client-facing applications, ensuring rigorous code reviews and maintaining exceptional data integrity and systematic processes. Implemented robust APIs and managed data flow using SQL, demonstrating capability in database interaction and system stability essential for reliable reporting and analysis. Gained practical knowledge of time series data and its application in system development.

Full Stack Intern

06/2023 - 11/2023

Netnedge - Sweden

Contributed to full-stack streaming web application development, implementing comprehensive end-to-end testing with Playwright to enhance software verification processes. Focused on codebase maintainability and scalability through meticulous work and adherence to software engineering principles.

Founder

01/2022 - 12/2022

Cedzlabs - Sweden, India

Founded a B2B software consultancy, autonomously leading strategic direction and technical execution for tailored software solutions, demonstrating initiative and self-direction. Incorporated signal processing techniques for complex data handling and analysis, highlighting problem-solving in data-intensive contexts.

Projects

AI Resume Tuner

React Next.js Node.js MongoDB LLMs Langchain RAG Stripe API NextAuth CI/CD FastAPI

Designed and developed an end-to-end full-stack web platform providing AI-powered feedback, leveraging LLMs and RAG for intelligent content analysis and generation. Demonstrated robust full-stack programming, database integration (MongoDB), and scalable system design applicable to creating structured data environments and user interfaces.

Inventory Management System

Next.js React PostgreSQL Docker AWS ML TensorFlow FastAPI CI/CD

Developed a real-time inventory management application focused on data-driven automation for stock monitoring and optimizing supply chain efficiency. Implemented machine learning-driven demand forecasting and utilized PostgreSQL for robust data management, showcasing skills in data analysis and application of analytical models. Designed for scalable system to handle and process diverse data sources.

AI-Powered Full-Stack Builder

Next.js Node.js Supabase LLMs AI SDK API Creation AI Agentic Frameworks (ADK) Signal Processing

Conceptualized and developed a cutting-edge web application for rapid prototyping and automated code generation, utilizing AI Agentic Frameworks (ADK), LLMs, and AI SDKs. Demonstrated proficiency in applying advanced AI frameworks and utilizing signal processing for effective data handling, relevant for data processing and presentation within digital platforms.

Education

Universität Konstanz

Master of Science in Computer and Information Sciences (AI and Robotics)

04/2025 - Present

Blekinge Tekniska Högskola

Bachelor of Science in Computer Science

08/2019 - 06/2023

GPA: 8.5

Achievements

Coordinator, Google DEVfest

Led and coordinated a large-scale tech event, fostering a creative and collaborative environment for members to learn, practice, and share innovative ideas. Demonstrated strong organizational leadership and community building skills, essential for early-stage team development.

Lead Team Member, Ericsson x TechConcept Lab

Played a key role in a collaboration focusing on Environment and Sustainability. Showcased a solution addressing the environmental impact of AI, emphasizing problem-solving, innovation, and proposing sustainable practices.

Languages

English (Native) German (Basic) Swedish (Basic)
